EDUCATION

Bachelor of Science in Computer Engineering and Physics May 2029
Minor: Mathematics **Distinctions:** College Scholar **GPA**: 4.0/4.0 (Institutional)
North Central College, Naperville, IL

EXPERIENCE

Summer Research Assistant May 2026 – August 2026
Department of Physics | North Central College | Naperville, IL

- Assisted in the design and development of a three-axis magnetometer
- Led the circuit board design, collection of calibration and field data, and design of the data acquisition software
- Shared the final product and results through a research poster presentation at the Rall Symposium for Undergraduate Research and an academic paper

Sales Associate, Five Below, Plainfield, IL January 2025 – Present

- Assist with front-counter retail, freight and set-up, and store recovery
- Prioritized service during periods of team shortages and high customer volume to effectively maintain a positive shopping environment
- Received Employee of the Month award within 1 month of employment in recognition of exceeding store goals and excellent customer service

PERSONAL PROJECTS

Expression Tree Data Type Summer 2026

- Created an algebraic tree designed to represent mathematical functions of multiple variables
- Capable of self-simplifying, substituting values for variables, and computing partial derivatives with respect to a given variable

Basic Data Structures Library Summer 2026

- Utilized data structures concepts to create implementations in Java
- Highlights include: Merge Sort, Heap Sort with Priority Queue, Hash Table, Static Graph with Dijkstra's Algorithm implemented, and deep copy methods implemented for all data structures

ACADEMIC PROJECTS

Data Structures: Function Interface Spring 2026

- Led a group in the construction of a custom calculus system that allows for the creation and manipulation of algebraic functions in Java
- Designed the user interface as well as all function classes (The version presented consisted of a Term class and a FunctionTerm class that can be combined using a CompositionTerm class)
- Presented our final project, including a demonstration of the interface
- *Continued to improve and modify the function classes over the summer (as seen in the expression tree above) for future personal projects such as a physics engine*

Microcontrollers: Smart House System Spring 2026

- Created an Arduino system that controls the systems in a toy house based on the current daylight level
- Required C++ and circuit implementation along with designing a house with lights, daylight sensor, and a mechanical door

Engineering Methods: Group Projects Fall 2025

- Participated in two class group projects: designing a linear actuator and a vertical axis wind turbine
- Led the planning, assembly, and testing of each project
- Disseminated our design methodologies and results through engineering reports

RELEVANT COURSEWORK

Web Applications *(Self-Studied)* Summer 2026

- Learned the foundations of web development and designed a personal portfolio using HTML, CSS, and JavaScript

Data Structures Spring 2026

- Designed common data structures from scratch in java and learned the benefits of different methods for the storage of and accessing data

Microcontrollers *(Self-Studied)* Spring 2026

- Audited the class at the professor's request; will take class again in Spring 2027
- Developed proficiency in Arduino programming and gathered basic knowledge of circuit design

Computer Organization and Design Fall 2025

- Developed an understanding of the levels and structure of modern software and gained practice in digital logic and assembly programming

Engineering Methods Fall 2025

- Gained hands-on experience in SolidWorks and 3D-printing and learned the principles of engineering design

LEADERSHIP AND ACTIVITIES

NCC Music Ensembles August 2025 – Present

North Central College Fine Arts Department, Naperville, IL

- Participant of 5 separate ensembles: member of marching band drumline, principal percussionist in orchestra, pep band member, concert winds member, and combo band member
- Enrolled in 2 music lessons: percussion lessons and composition lessons
- Manage 20 hours per week of participation, practice, and performances with a full academic course load through a strong work ethic and time management

Eagle Scout Service Project, BSA, Troop 13, Plainfield, IL January 2023 – May 2024

- Successfully designed and led a team of volunteers in the construction of communication boards for children with special needs to be used at two elementary schools in Plainfield
- Developed skills such as time management, accountability, communication, and adaptability

HONORS AND AWARDS

- **NCC Dean's List**: Fall 2025, Spring 2026
- **PNHS National Honor Society**: May 2025
- **DPED Award**: May 2025
- **Eagle Scout Rank**: November 2024

SKILLS

- **Software:** Microsoft Tools, KiCad/LTSpice, SolidWorks
- **Programming:** Python/GDScript, Java, C++/Arduino, x86 Assembly, HTML/CSS/Javascript
